

COMING IN JUNE

THE 2013 TECHNOLOGY ISSUE

Canadian Equipment Finance presents a special two-way report on technology in the leasing and financing market.

The first part of our Special Report examines the latest technological tools, data systems, asset management software and tech ideas leverage operations to reduce costs, improve services and manage data—and more.

Learn about the coming offerings from the industry's key technology providers.

The second part of our Special Report examines the financial opportunities in the technology sector for financing companies.

Learn about the ways lenders are improving their funding offerings to companies which want to expand, upgrade, improve and overhaul their technology assets.

All this and more in the June issue of Canadian Equipment Finance.
